

# DANAI GIANNELLI

*Handmade Jewelry*

## Ring Size

---

Before you start, you need to make sure that your printout is scaled correctly.

- **Measure the line below**, so that it is exactly 5 cm. If it isn't, you must check printing options. You need to choose "print to real size" or scale 100%.

- **Use a closed ring** (i.e. a ring that has no opening) and it is perfectly round inside, place it on the circles below until you find the circle that matches exactly the inner perimeter of your ring.
- **Mark the size number** stated inside the circle and you are all set. In case none of the circles below matches exactly the inside of your ring, note the one with the better fit.
